Vision Preferences Checklist

Your Na	ame:	Date:	NEVADA EYE CONSULTANTS BURGERY & DIBEASEE OF THE EYE
The term "cataract" refers to a cloudy lens within the eye. When a cataract is removed, a lens implant is placed inside the eye to replace the cloudy human lens. Occasionally, clear lenses that have not yet developed cataracts are also removed to reduce or eliminate the need for glasses or contacts. If it is determined that surgery is appropriate for you, this questionnaire will help us provide the best treatment for your visual needs. Please fill this form out completely and return it to us.			
If surgery is recommended for you, would you be interested in seeing well without glasses in the following situations? Distance Vision: driving, golf, tennis, other sports, watching TV		If you could have good Distance Vision during the day without glasses, and good Near Vision for reading without glasses, but the compromise was that you might see some halos or rings around lights at night, would that be OK with you?	
	Mid-Range Vision: computer, menus, price tags, cooking, board games, items on a grocery shelf	☐ YES ☐	NO
	Near Vision: reading books, newspapers, magazines detailed handwork	If you could have good Distance the day and night without glass Mid-Range Vision without glass compromise was that you migh	ses, and good ses, but the nt need glasses
Please check the <u>single</u> statement that best describes you in terms of <u>night vision</u> :		for reading very small print at r like that option?	near, would you
	Night vision is extremely important to me, and I require the best possible quality night vision.	YES] NO
	I want to be able to drive comfortably at night, but I would tolerate some slight imperfections.	Please list up to three favorite l	
	Night vision is not particularly important to me.	Please place an "X" on the follo describe your personality as be	_
